Mancuernas Pro-Style Élite 22,5kg BLK EDT

Pro-Style Elite Dumbbells – Professional Performance, Aesthetic Design & Superior Durability

High-quality Pro-Style Elite dumbbells with odor-free PEV coating. Compact and impact-resistant with a **12-sided design** to prevent rolling. Chrome-plated ergonomic handle for optimal grip and control. Sold individually.

Product description:

The **O'Live Pro-Style Elite Dumbbells** are designed to deliver maximum performance and longevity in **professional training environments**, including gyms, personal training studios, and high-traffic fitness centers.

Thanks to their innovative **PEV (Polymeric Elastomer Vinyl) coating**, these dumbbells offer **greater resistance** than traditional rubber models, are **completely odor-free**, and maintain an **impeccable aesthetic finish** even under heavy daily use.

Professional Engineering and Functional Design

The **12-sided anti-roll design** enhances safety and keeps training spaces organized. Unlike conventional models, the **heads are made of solid steel**, not cast iron — providing a **more compact structure, balanced feel**, and **superior impact resistance**.

The **chrome-plated handle (34 x 150 mm)** features an **anti-slip knurling pattern**, ensuring a **secure, corrosion-resistant grip**

for comfortable and safe training sessions.

Technical Composition

- **Heads:** Solid steel (not cast iron)
- **Coating:** PEV material (more durable than rubber)
- **Handle:** Hard chrome finish, 34 mm x 150 mm
- **Shape:** 12-sided, anti-roll
- **Sold:** Individually

Advantages of PEV Coating

- Exceptional resistance to wear, impacts, and cleaning products
- Odor-free (ideal for enclosed training spaces)
- Maintains an aesthetic, professional look over time
- Easy-to-clean, hygienic surface

FAQs

What makes these dumbbells different from traditional rubber-coated ones?
The PEV coating is more durable, odorless, and keeps its visual quality longer. Solid steel heads improve balance and compactness compared to cast designs.

Are they suitable for intensive commercial use?
Yes. Built specifically for **daily use in commercial gyms** and **high-frequency training zones**.

Are they sold as pairs or individually?
Sold individually, allowing flexible purchasing based on facility needs.

Can they be stored in vertical racks or dumbbell towers?
Yes. Their **compact size** and **12-sided design** prevent rolling, ensuring full compatibility with most professional storage systems.

Benefits for Your Fitness Facility

- Elevates the perceived quality of your gym equipment
- Ensures long-term investment durability
- Prevents rolling accidents and improves safety
- Perfect for free-weight zones, guided sessions, or HIIT training circuits
