

Jumping Platform O'Live, 76 cm

Foamjumping platform provides a safe and stable base.

Being a soft material, the **consequences of possible stumbles are minimized**. Ideal for jumping at different heights **to exercise your endurance**

Product description:

An ordinary box can present some risk to inexperienced or tired athletes and users, which is why the Oliveplyometric platform is **essential for performing jumping exercises and exercising your endurance**

The foamjumping platform provides a **safe and stable base that eliminates that risk**.

Being a soft material, the consequences of **possible stumbles are minimized**.

For this reason they are used for **explosive jumps at high heights** or by less experienced users.

Available in different heights, they can be stacked one on top of the other by means of Velcro.

Made of high density Eva foam.

Action: 76 cm
