

O'live ORC Portable Training Structure

Training station compact, robust and complete ideal for home.

Ideal training equipment to have a mini gym at home. Works functional training, bodybuilding, strength and endurance. In an airtight storage space.

ORC is very practical, because it is not a fixed structure, so it does not require fixing it to the ground being **ideal for terraces, gardens or roofs** that can not be drilled. **It can be easily moved or stored according to the season.**

Easy to assemble, transport and treated for outdoors.

Product description:

The ORC station is a perfect solution for safe and effective exercises.

Its compact shape makes it even more attractive, plus one of the best features on the market: **ASSEMBLY IN LESS THAN 15 MINUTES. Now you can enjoy the benefits of a functional and cross training structure in record time.**

But, do I have to have a specific space to do sport with the ORC station?

nO! Apart from its easy assembly, its added value is that it is self-supporting, **that is**, now you don't need to fix it to the floor, so you can change the training place whenever and wherever you want. Are you ready? You will be able to move the ORC station without any problems with its side wheels. **Watch the video**

here

Finally, this product satisfies a basic need when it comes to sports, **multifunctional storage**, as it allows you to collect the structure inside to move and relocate the ORC station whenever you want.

what new features can I find in the ORC station?

As we have already mentioned, one of the remarkable aspects of the ORC is that it is not a fixed structure, so it does not need to be fixed to the ground, making it ideal for terraces, gardens or roofs that cannot be drilled. It can be easily moved or stored according to the season.

In addition, its design allows several people to work at the same time while keeping the safety space.

The trunk can store additional training materials such as dumbbells, kettlebells, shoulder bags or functional bags, agility ladders, cones, hurdles, so you can store all the necessary materials to set up a complete training area.
