
Bench Olympic horizontal proseries O'Live Fitness

Professional Strength and Durability for Demanding Athletes

The O'live Pro Series PL33000 Horizontal Press Bench is designed for those seeking maximum stability and safety in their workouts. The main frame, constructed of 50 x 120 x 3 mm oval tubing, offers superior rigidity. This type of material not only guarantees that the bench will withstand heavy loads, but also ensures that it will hold firm during the most intense workouts.

Product description:

The 8mm stainless steel strength in the bar supports provides a reliable base for lifts, allowing users to focus on their performance without worrying about the integrity of the equipment. It is ideal for both professional athletes and those who want a gym-level workout at home.

Efficient Design with Integrated Storage

One of the great advantages of the O'live Pro Horizontal Press Bench is its disc storage functionality. With two hard chrome-coated holders for Olympic discs, this bench not only makes it easy to quickly access discs during your routine, but also keeps your workout space organized. The efficient design makes it quicker and easier to change weights between sets, optimizing the time of each session. Plus, the chrome-plated finish ensures a long, rust-free lifespan, which means less worry and more performance in the long run.

Stability and Style That Lasts

This bench is not only durable, but also visually appealing. The epoxy paint finish gives it a protective coating that resists corrosion, making it ideal for both commercial gyms and private spaces. The rubber bases provide extra stability during each exercise, preventing any unwanted movement that could affect the quality of your repetitions or cause injury. In addition to its sturdiness, the modern design and high quality finish make it a standout piece in any training environment. Working out has never been so safe, comfortable and aesthetically pleasing!
