
Elite Lifting Platform O'Live Fitness

Elite Weightlifting Platform with Advanced Shock Absorption System

Transform your weightlifting routine with our Elite Lifting Platform, designed to provide maximum performance and safety. This innovative platform is the perfect ally for athletes looking to improve their technique and protect both equipment and environment.

Product description:

Main Features:

- **Advanced Shock Absorption:** Our platform is equipped with a shock absorption system that uses high-strength rubber blocks under its surface. These blocks not only minimize the impact of weight hitting the ground, but also significantly reduce noise, creating a safer and quieter environment for training.
 - **Comprehensive Safety:** With a durable, non-slip rubber coating, our platform provides a stable and comfortable base for every lift. This not only improves grip during movements, but also helps prevent injury by providing an even and safe surface for each repetition.
 - **Optimized Performance:** By using our lifting platform, athletes can focus entirely on perfecting their technique without worrying about damage to the floor or wear and tear on equipment. This results in a noticeable improvement in the correct execution of each movement, which boosts overall performance.
-

-
- **Durability and Strength:** Built with a robust steel profile and high quality materials, our platform is designed to withstand intensive use over time. This ensures a long equipment life and a lasting investment for your training space.

Technical Specifications:

- Dimensions: Length 3040 mm x Width 2040 mm x Height 40 mm
- Lifting Area: 200 x 100 cm
- Lifting Surface: Non-slip vinyl on wooden base
- Impact Area: 20 mm of PU foam + 20 mm of high density rubber
- Structure: Steel profile 40x20 mm
