Power Rack O'Live Fitness

The Power Rack from **O'Live Fitness** is a complete training station, customizable with a variety of O'live accessories. Made in Spain, this rack stands out for its robustness and durability, ideal for professional gyms.

Product description:

The 80 x 80 mm and 3 mm thick columns offer multiple anchor points, ensuring stability and versatility. In addition, it has laser-cut numbers to facilitate the adjustment of bar supports and safety systems, guaranteeing safe and efficient training.

The columns are made of iron coated with textured black epoxy paint, providing superior wear resistance and a sleek appearance.

Optimize your workout space with the **O'Live Fitness Power Rack** and experience the highest quality and functionality in every workout.

- **Pull-Up Bar:** Structures include a pull-up work area for high-quality pull-up exercises that strengthen the upper body and improve spinal stability.
- **Adjustable Safety Stands:** Adjustable safety stands, arms or straps, depending on the client's budget, always provide additional safety during your workouts, allowing you to perform heavier exercises with confidence.
- **Adjustable J-cups**: Adjustable J-cups on the Power Rack and Half Rack allow the height of the bars to be adjusted to meet

the athlete's needs. There are two models to choose from depending on the user's needs.

- **Compact Design:** The compact design of both racks makes them perfect for those who need a power station but don't have enough space for a large structure.
- **High-quality finish:** The high-quality finish and EU manufacturing process provides a sleek, durable look that will last for years of intense training.
- Each Rack features the ability to add the Elite PL29700.01 lifting platform
