

Cantilever accessory 1050 mm O'Live Fitness

Perfect Suspension for your Wooden Rings

The 1050 mm cantilever accessory has been designed to offer the best suspension solution for wooden rings, providing a firm and secure hold. Whether you are performing gymnastics training or strength exercises, this accessory guarantees stability and ease of use.

Compatible with O'live Fitness frames, it allows for seamless integration, optimizing your workout space with an efficient and practical installation.

Product description:

Secure Installation with Essential Accessories

For proper and secure attachment, this accessory requires two eyelets with carabiners (ES35902.00), providing added security during your workouts. These eyelets ensure that the rings are suspended correctly, giving you the confidence you need to execute demanding movements. The carabiners are easy to use and ensure a firm hold, allowing you to concentrate on your workouts without worry.

Versatile and Durable Design for All Levels

Made to fit any column of **O'live Fitness frames**, the cantilever attachment **measures 105 x 39 x 8 cm**, making it a versatile choice for a variety of workouts. Its sturdy construction ensures that it can withstand daily use, making it a durable addition to both home gyms and fitness studios. This accessory enhances the modularity of your equipment, allowing you to

adapt it to different workout routines and exercise needs with ease.
