

Inclined ladder 1100 mm O'Live Fitness

Maximize Your Workout with the Incline Ladder

Transform your workout space with the incline ladder, an essential extension to **O'Live Fitness structures**. Equipped with **four 32 mm diameter bars**, spaced **40 cm apart**, this ladder offers multiple training options. Not only can you perform traditional pull-ups, but you can also suspend gymnastic rings, punching bags or super bands by adding our accessory (ES34400.00). **Expand your possibilities and challenge your routine** with this versatile tool.

Product description:

Flexible and Customizable Installation

The incline ladder can be mounted at any desired height on the column, with a **reach of 108 cm from the front edge**. Thanks to its **45° angled** design, it **protrudes approximately 750 cm** above the top of the column, giving you additional space for advanced exercises. This installation flexibility allows you to tailor your equipment to your specific needs, ensuring a comfortable and effective workout.

Sturdy Construction and Secure Grip

Made from **80 x 80 x 3 mm thick profile tubing and epoxy** powder coated, the incline ladder is not only durable, but also offers a textured surface that provides a firm and secure grip during your workouts. This model is **designed specifically for 1100 mm widths or short modules**, with an **additional version available for 1700 mm widths**. Invest in equipment that guarantees stability and resistance for your most intense workouts.
