
Inclined ladder 1700 mm O'Live Fitness

Power Your Workout with the Incline Ladder

Elevate your workout with the incline ladder, a **must-have extension to O'Live Fitness equipment**. Equipped with **four 32 mm diameter bars, spaced 40 cm apart** (although this distance can be adjusted), this ladder offers you a variety of training options. In addition to traditional pull-ups, you can suspend gymnastic rings, punching bags or super bands using the additional accessory (ES34400.00). Expand your exercise repertoire and challenge your limits with this versatile tool.

Product description:

Customized Installation for Each User

The incline ladder mounts easily to the desired height of the column, offering a **reach of 108 cm** from the front edge. With a **45° angle**, it **protrudes approximately 750 cm above the top of the column**, providing ample space for complex and challenging exercises. This **installation flexibility** allows you to customize your equipment according to your needs and preferences, **ensuring a comfortable and effective workout**.

Robust and Safe Design for Intense Workouts

Constructed with an **80 x 80 x 3 mm thick profile tube and epoxy** powder coated, the incline ladder ensures **exceptional durability**. Its textured surface provides a firm and secure grip, allowing you to concentrate on your performance without worry. This model is designed specifically for 1700 mm widths or long modules, with an additional version

available for 1100 mm widths. Invest in equipment that combines robustness and functionality for your most intense sessions.
